

Distinctive. Modern. Concrete with personality. The Sevn table exemplifies the hidden potential and luring sensuality of crafted concrete while shattering the ubiquitous and utilitarian ideologies of this age old building material. Entirely handcrafted and refined in Meld's award-winning extremeconcrete® material, the Sevn table expresses true form and function through the juxtaposition of materiality and translucency. Three Sevns are required to support the glass table top and can be arranged in a multitude of configurations.

Design | William Gordon
